SUMMARY

Final-year Computer Science (AI) student and aspiring Machine Learning Engineer with internship experience and hands-on project experience in computer vision, deep learning, and real-time AI systems. Skilled in Python, PyTorch, OpenCV, Flask, FastAPI, and Generative AI. Passionate about building intelligent solutions and seeking a full-time role in AI/ML engineering where I can apply and grow my skills in innovative environments.

EDUCATION

Adi Shankara Institute of Engineering and Technology, Kerala Oct 2022 – May 2026
B.Tech in Computer Science (Artificial Intelligence) **CGPA: 7.2**

Govt HSS, Chirakkara, Kerala **Class XII - 85.4%**
PRMHSS, Panoor, Kerala **Class X - 94.5%**

INTERNSHIP

- **Pearl Data Direct - A Fintech Company under LuLu Group** May 2025 – Jun 2025
Contributed to automation and AI-based solutions for internal systems.
Designed and implemented real-time solutions using tools like OpenCV, PyTorch, and Flask
Assisted in document processing for eKYC (ID card background removal automation).
- **Python & Django Intern – Facein Technologies** 2024
Built simple web applications with backend logic, database integration, and REST APIs using Python and Django under guidance.
- **Data Science & ML Intern – Techmaghi** 2023
Learned and applied data preprocessing, visualization, and small-scale ML model building using Python and Scikit-learn.

PROJECT

- **Smart Neonatal Incubator Monitoring System Using AI and IoT** March 2026
Developed a real-time neonatal monitoring system using FastAPI, React, and WebSocket communication.
Implemented computer vision techniques to detect jaundice and bluish skin colour from video frames.
Built an audio-based cry detection module using Librosa and Random Forest to identify infant distress.
Designed a responsive dashboard using React, TypeScript, and TailwindCSS for real-time monitoring and alerts. Integrated multithreaded backend processing for simultaneous visual and audio analysis.
- **ID Card Background Remover – Deep Learning & Computer Vision** May 2025 - June 2025
Implemented U²-Net (PyTorch) for ID card segmentation with F1 score 0.99.
Built a Flask API for real-time background removal and auto-cropping.
Integrated OCR and face matching for eKYC automation use cases.
Applied Albumentations + OpenCV for preprocessing and augmentation.
- **Smart Canteen Appointment System – Digital Ordering Platform** Jan 2024 - May 2024
Built a digital food ordering platform with cart payment gateway.
Reduced waiting time by scheduling orders pickup flow optimization.
Designed customer interface + admin dashboard with database integration.
Implemented authentication security features for safe transactions.

SKILLS

Languages/Frameworks: Python, C, Java(Basic), SQL(Basic), Microsoft Excel(Basics), Flask, AI Tools, OpenCV, PyTorch, REST API Development

Soft Skills: Leadership, Teamwork, Communication, Problem-Solving, Adaptability, Creative Thinking, Time Management

Languages Known: Malayalam, English

Achievements & Participations

- Salesforce Champion and Innovator Badge – Salesforce Trailblazer Community (2025)
- Certification on Cybersecurity by ICT Academy
- Certification on Full Stack Development by GP3 Cloud
- Cybersecurity Essentials – Cisco Networking Academy
- Participated in HackGen AI Hackathon conducted by KSUM
- NPTEL Certification - Deep Learning - IIT Ropar
- NPTEL Certification - Python for Data Science
- 2nd Prize – IEEE AI Adventure Hunt
- IEEEExtreme 17.0 & 18.0 Competitor
