SUMMARY

AI & Machine Learning graduate with hands-on experience in deep learning, computer vision, and real-time AI systems through internships and projects. Skilled in Python, PyTorch, OpenCV, FastAPI, and Flask, with experience developing AI-powered solutions for eKYC automation and intelligent monitoring. Passionate about building innovative AI solutions that solve real-world problems.

EDUCATION

Adi Shankara Institute of Engineering and Technology, Kerala Oct 2022 – May 2026
B.Tech in Computer Science (Artificial Intelligence) **CGPA: 7.38**

Govt HSS, Chirakkara, Kerala **Class XII – 85.4%**
PRMHSS, Panoor, Kerala **Class X – 94.5%**

INTERNSHIP

- **Pearl Data Direct – Fintech Company under LuLu Group** May 2025 – Jun 2025
 - Developed an AI-based ID card background removal system using U²-Net (PyTorch) for eKYC document processing, achieving an F1 score of 0.99.
 - Built a Flask REST API for real-time background removal and automatic ID card cropping.
 - Applied OpenCV, PyTorch, OCR, and face-matching techniques to support document verification workflows.
- **Python & Django Intern – Facein Technologies** 2024
 - Developed web applications with user authentication, database integration, and REST APIs using Python and Django.
- **Data Science & ML Intern – Techmaghi** 2023
 - Learned and applied data preprocessing, data visualization, and machine learning concepts using Python and Scikit-learn.

PROJECTS

- **Smart Neonatal Incubator Monitoring System – AI & IoT** March 2026
 - Built a real-time neonatal health monitoring system using FastAPI, React, TypeScript, and WebSocket communication, processing live video and audio streams simultaneously via a multithreaded backend.
 - Implemented computer vision (OpenCV, PyTorch) to detect jaundice and cyanosis from video frames; built an audio-based cry classification module using Librosa and Random Forest for infant distress detection.
- **ID Card Background Remover – Deep Learning & Computer Vision** May 2025 – Jun 2025
 - Implemented U²-Net (PyTorch) for ID card segmentation achieving F1 score 0.99; built Flask API for real-time background removal and auto-cropping.
 - Integrated OCR and face matching for eKYC automation; applied Albumentations + OpenCV for preprocessing and augmentation.
- **Smart Canteen Appointment System – Digital Ordering Platform** Jan 2024 – May 2024
 - Built a full-stack food ordering platform with cart, payment gateway, and admin dashboard; reduced customer waiting time via optimized order scheduling and pickup flow.
 - Implemented secure authentication and database integration supporting multi-user concurrent sessions.

SKILLS

Programming: Python, C, Java (Basic), SQL

AI & ML: Machine Learning, Deep Learning, Computer Vision, NLP, PyTorch, OpenCV, Scikit-learn, Generative AI, LLMs

Backend: FastAPI, Flask, Django, REST API Development

Frontend: React, TypeScript, TailwindCSS

Tools: Git, GitHub, VS Code, Postman, Jupyter Notebook, Google Colab, Power BI, Albumentations

Soft Skills: Problem Solving, Communication, Teamwork, Leadership, Adaptability

Languages: English, Malayalam

ACHIEVEMENTS & CERTIFICATIONS

- **NPTEL Certification – Deep Learning (IIT Ropar)** – completed with active participation in assignments and quizzes
- **2nd Prize – IEEE AI Adventure Hunt** (competitive AI/ML problem-solving event)
- **Salesforce Champion & Innovator Badge** – Salesforce Trailblazer Community (2026)
- **Certification – Full Stack Development** by GP3 Cloud | **Cybersecurity Essentials** – Cisco Networking Academy
- Participated in **HackGen AI Hackathon** conducted by Kerala Startup Mission (KSUM)
